

ZEXUAN ZHANG

BIOMEDICAL ENGINEERING STUDENT

+44 7523189603 | zhangzexuan4@gmail.com | 35 Amies St., London

EDUCATION

King's College London

Bachelor of Biomedical Engineering

London, UK

2025 - 2028

EXPERIENCE

King's College London

London, UK

2025 - Present

- Deployed OpenClaw and various LLM tools locally for personal projects.
- Built several Python tools with AI assistance, including a vocabulary-learning app with customisable word lists, an automated tool to source and download academic papers, and data-analysis scripts (portfolio available).
- Joined a CAD project three days before the deadline; built 80% of the models and led the final presentation, achieving a 90%+ score.
- Received a CAD software award from a professor (portfolio available).
- Running a small machine learning group with classmates on Kaggle, building models for real-world scenarios.
- Member of King's Investment Banking Society, with foundational finance knowledge and practical trading experience.
- KCL Peer Assisted Learning leader.
- Skilled at breaking down complex material into clear, digestible explanations.
- Maintained a diverse, cross-cultural network spanning Europe, the Americas, Africa, and Asia.
- Strong grounding in international history.

Institute of Biomedical Engineering, Chinese Academy of Medical Sciences

Tianjin, China

(China's national medical research academy)

July 2026

- Analysed physiological data from 25 participants to test whether transcutaneous electrical nerve stimulation (TENS) mitigates VR-induced motion sickness. Filtered electrocardiogram signals in MATLAB to derive heart rate, then modelled HR against VR stimulus intensity across TENS and control conditions. Results supported a positive correlation between TENS stimulus intensity and motion sickness mitigation.
- Developed part of the software for data acquisition and signal processing in Python for a non-invasive Brain Computer Interface prototype based on functional near-infrared spectroscopy (fNIRS), classifying haemodynamic responses into a binary control output with ~80% classification accuracy (chance = 50%).

Taiyuan NO.5 Senior High School (For domestic universities only)

2022 - 2025

- Completed self-study for A-levels and IELTS within a single year, outside a traditional school environment.
- Participated in numerous Model United Nations conferences, developing strong impromptu public speaking and negotiation skills.
- Teaching Assistant for Mathematics.

PROFESSIONAL SKILLS

- Programming: MATLAB, Python, C++(Basic), SQL(Basic), R(Basic)
- Other: Excel, PowerPoint, Tableau(Basic)

ADDITIONAL INFORMATION

- Languages: English(Proficient), Chinese(Native), German&French(Basic)
- Interests: Literature, Philosophy, Economics, Languages, History
